

Overcoming Learning Challenges

- Is your child struggling in school and his needs are not being met?
- Are you already homeschooling but wonder if your child should be learning more easily?
- Do you need help formulating a plan to meet your child's learning challenges?

Family Academy, in cooperation with Center for Neuro Development, offers "Overcoming Learning Challenges," an informative course on effective home education of children with learning challenges.

In approximately 15 hours of online work in the "Overcoming Learning Challenges" course, parents can learn how to develop an individualized home instruction plan for the child with learning challenges. This is a self-pace online course over the period of 4 weeks. This class is available anywhere with Internet connections.

Upon completion of the course you will have 30 minutes via phone or Skype with International Christian Association of Neurodevelopmentalist certified Neurodevelopmentalist, Maggie Dail. Maggie who has over 30 years of teaching experience and over 20 years of work with homeschoolers developed this course. She maintains Washington State and Association of Christian Schools International certification with endorsements in a number of areas including Special Education.
